

Digital Futures; Verify In Field

Workshop 05; Pratt Fall 2015

Feb. 28, 2015

to·pog·ra·phy

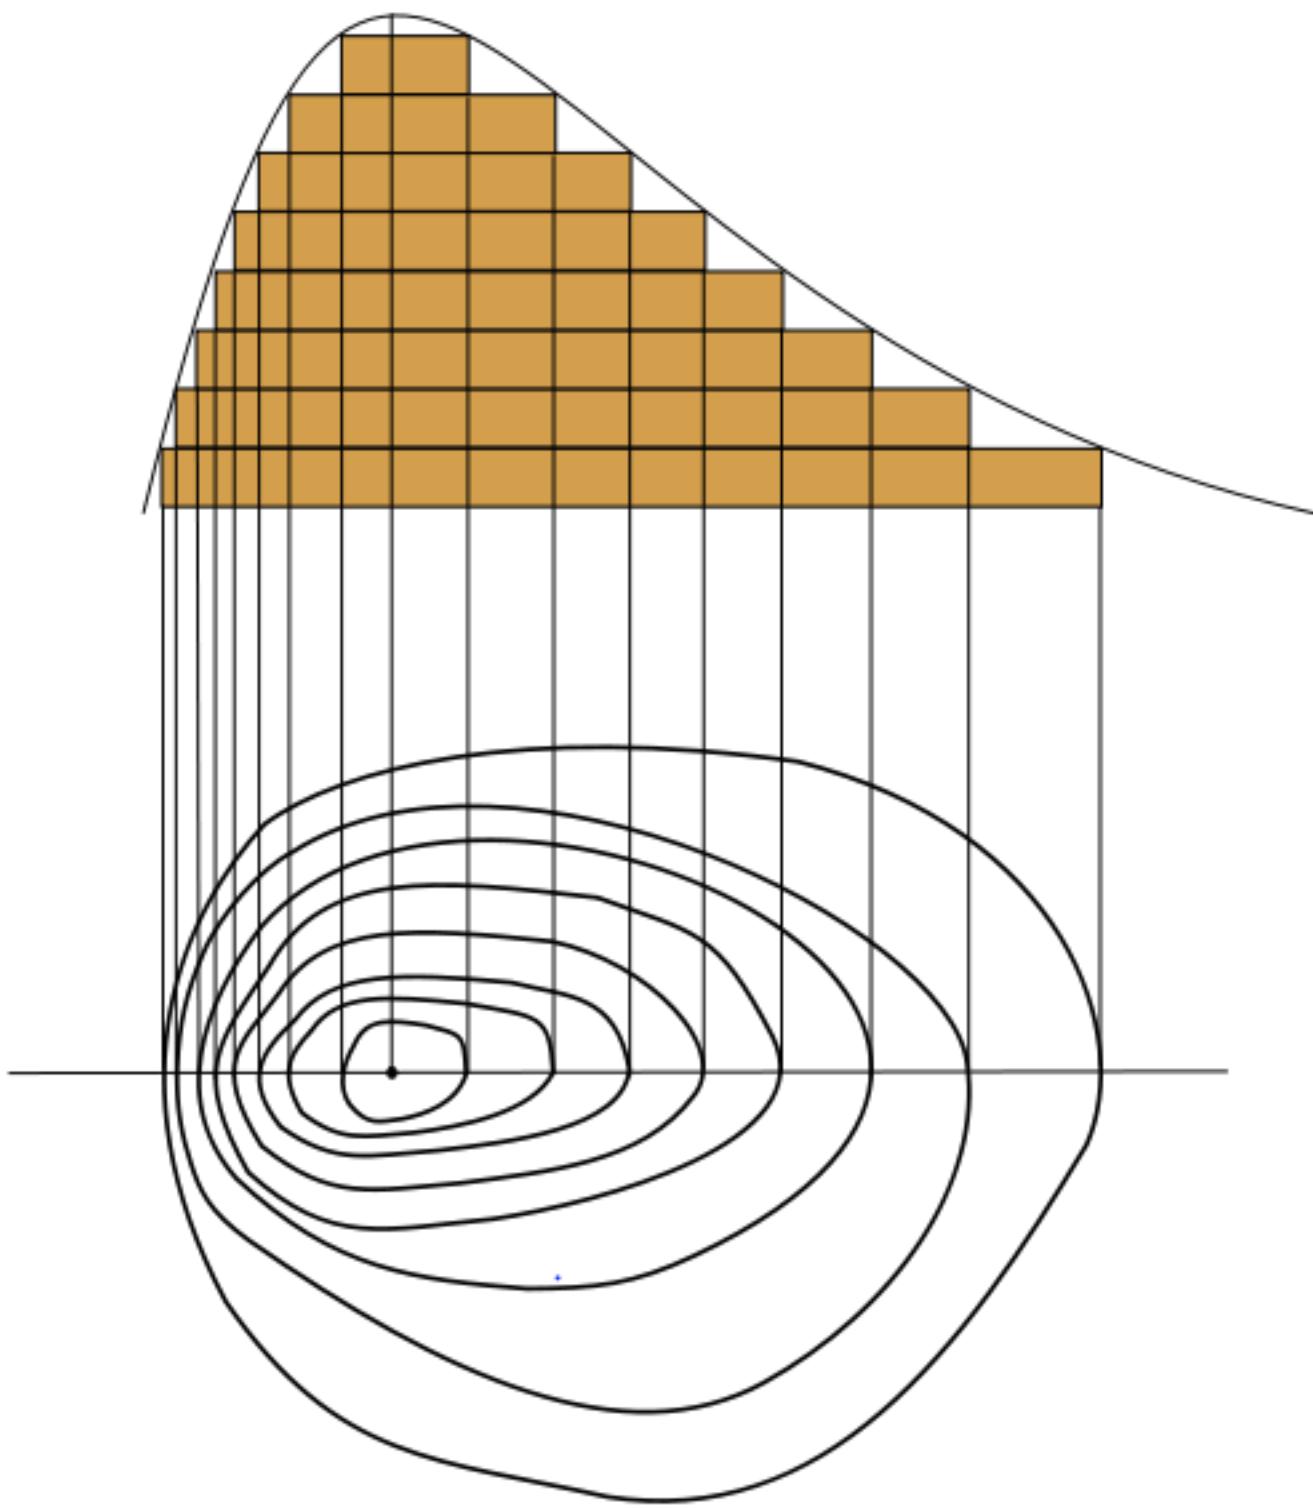

noun

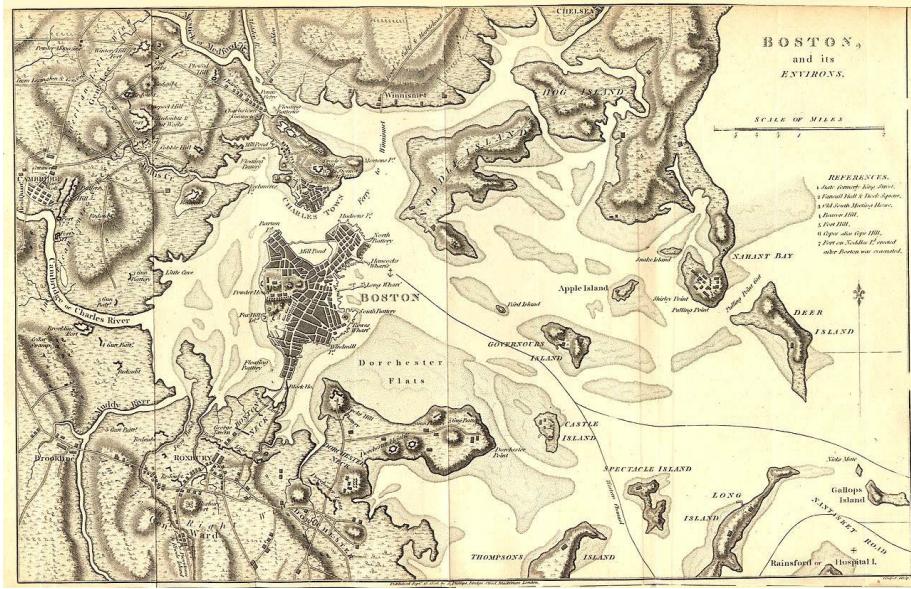

1.

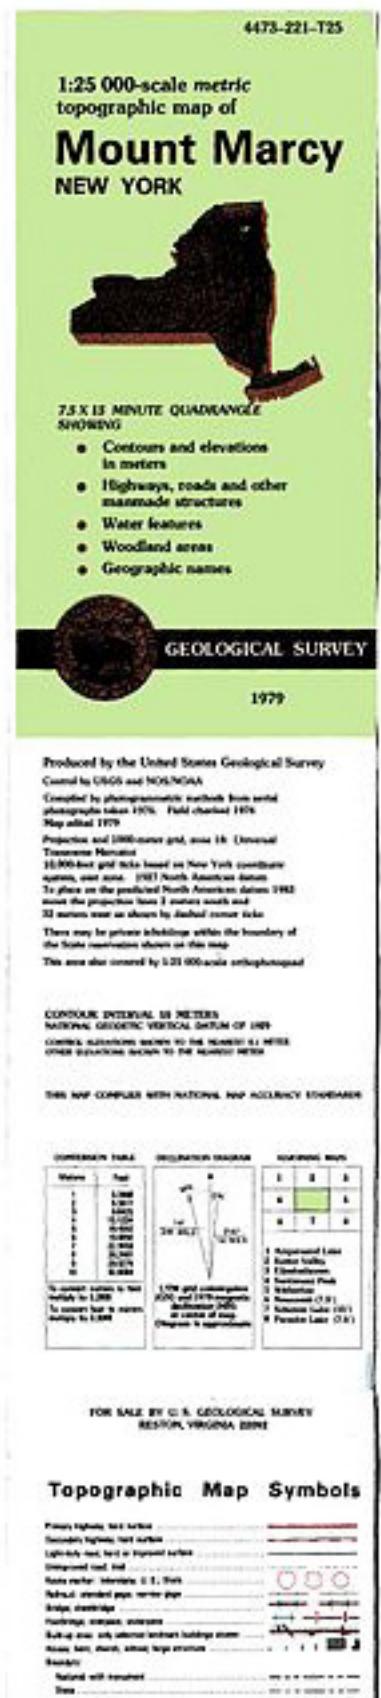

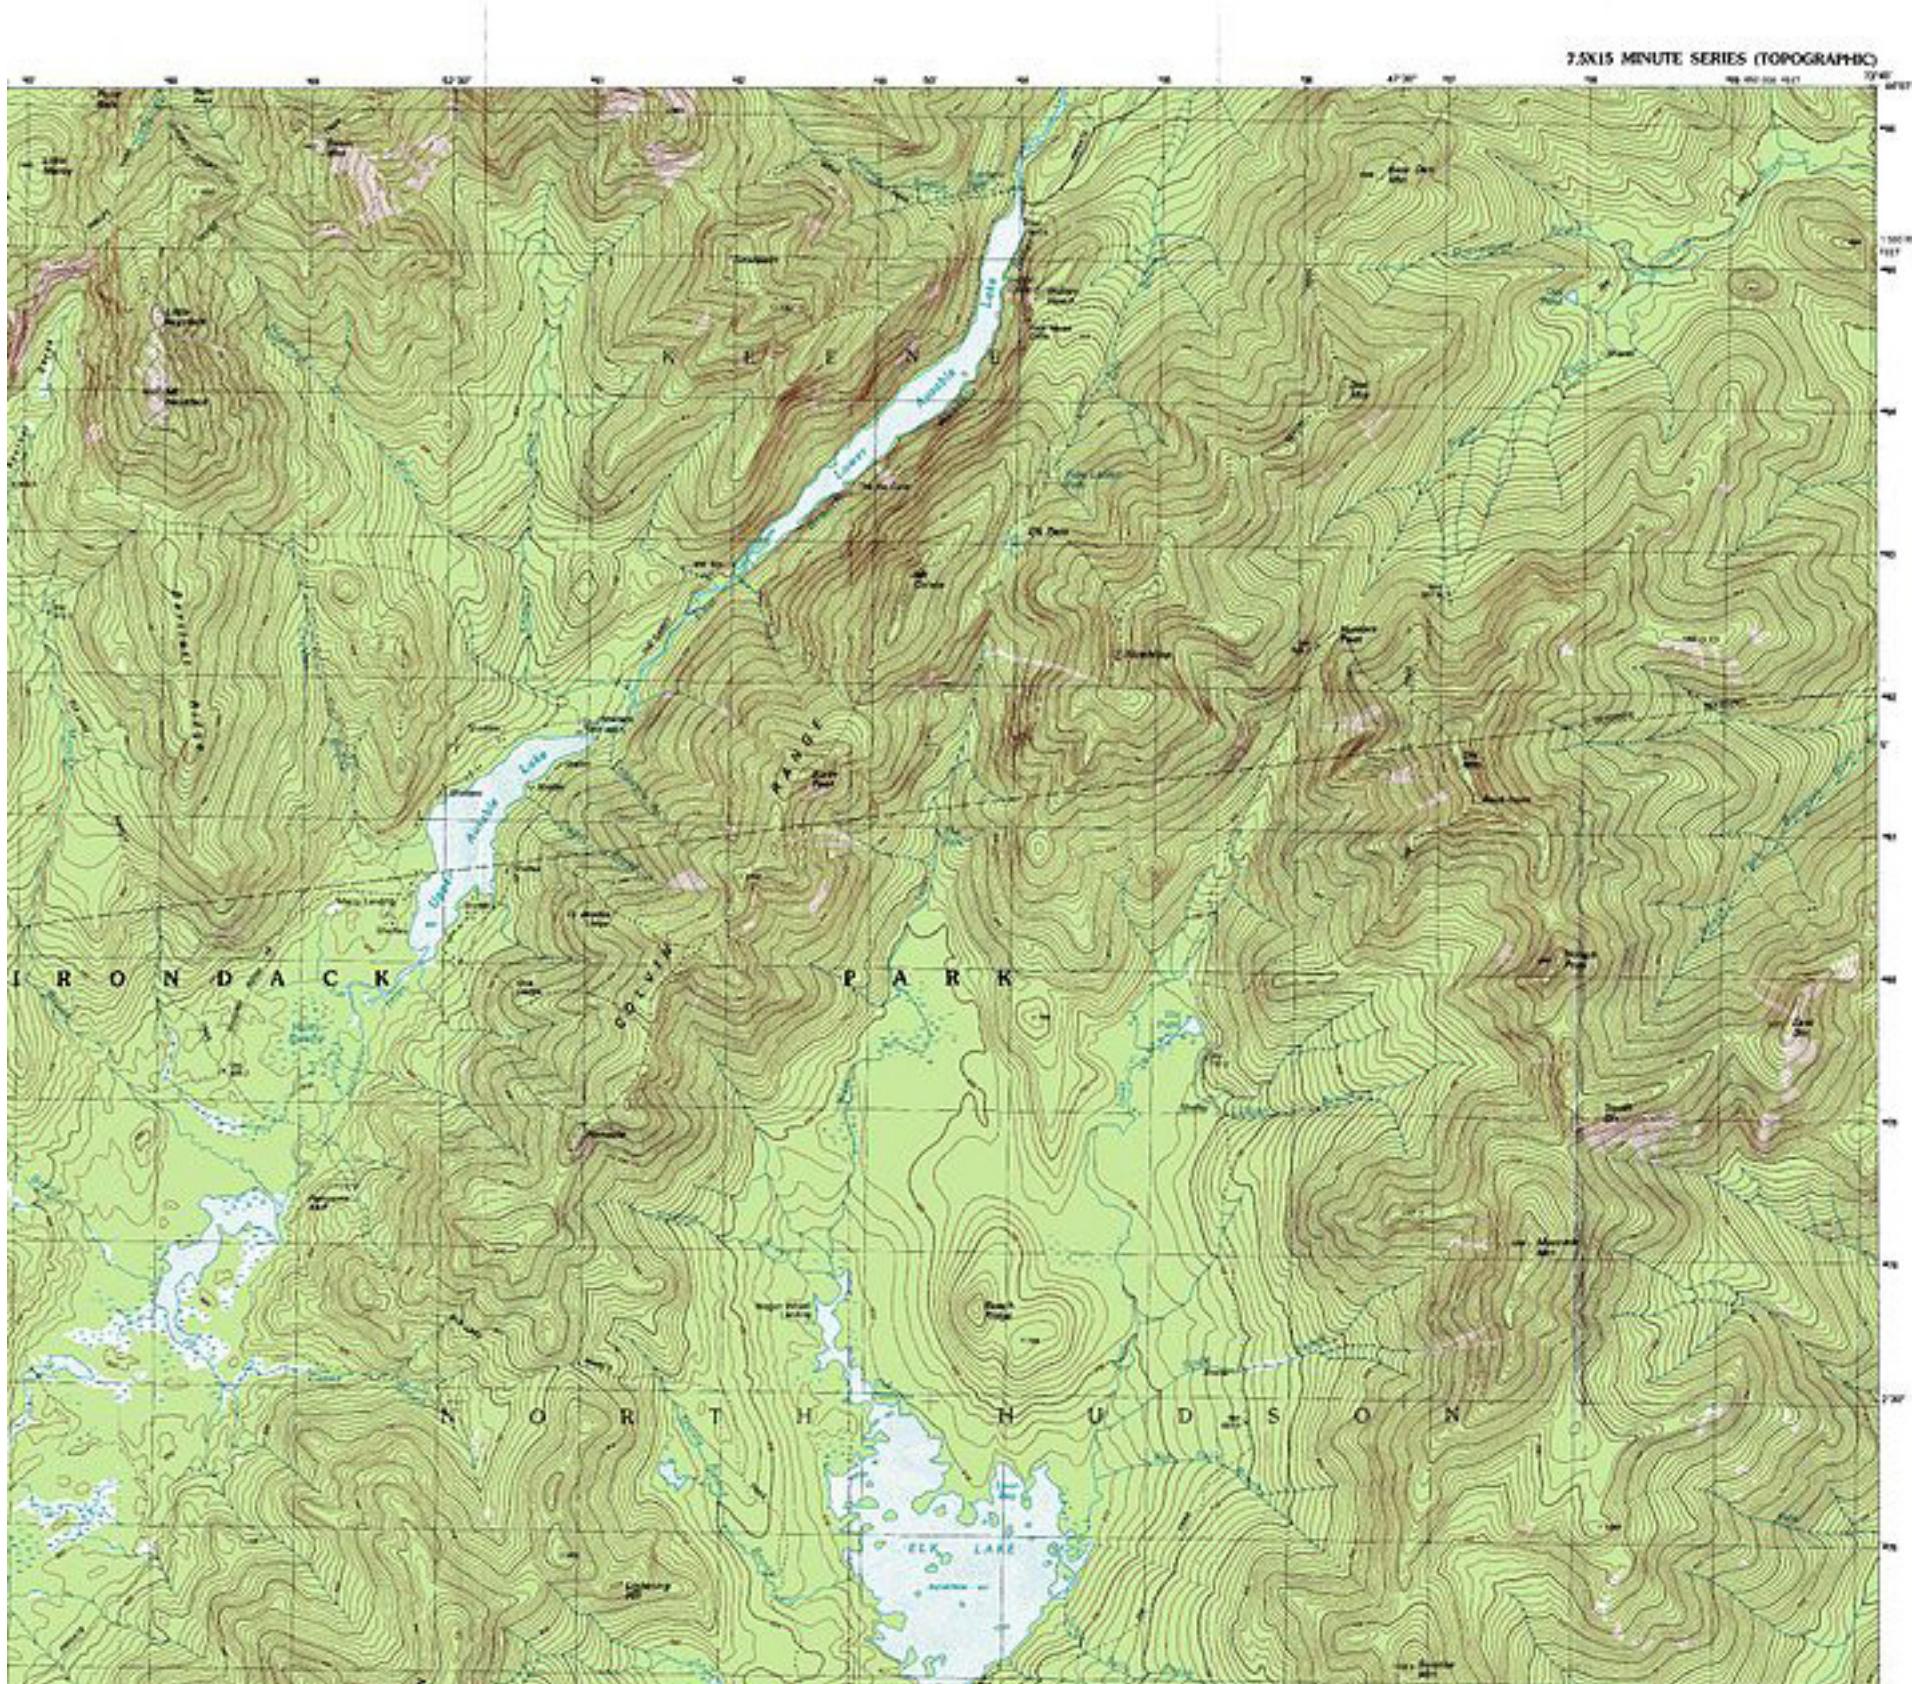

the arrangement of the natural and artificial physical features of an area.

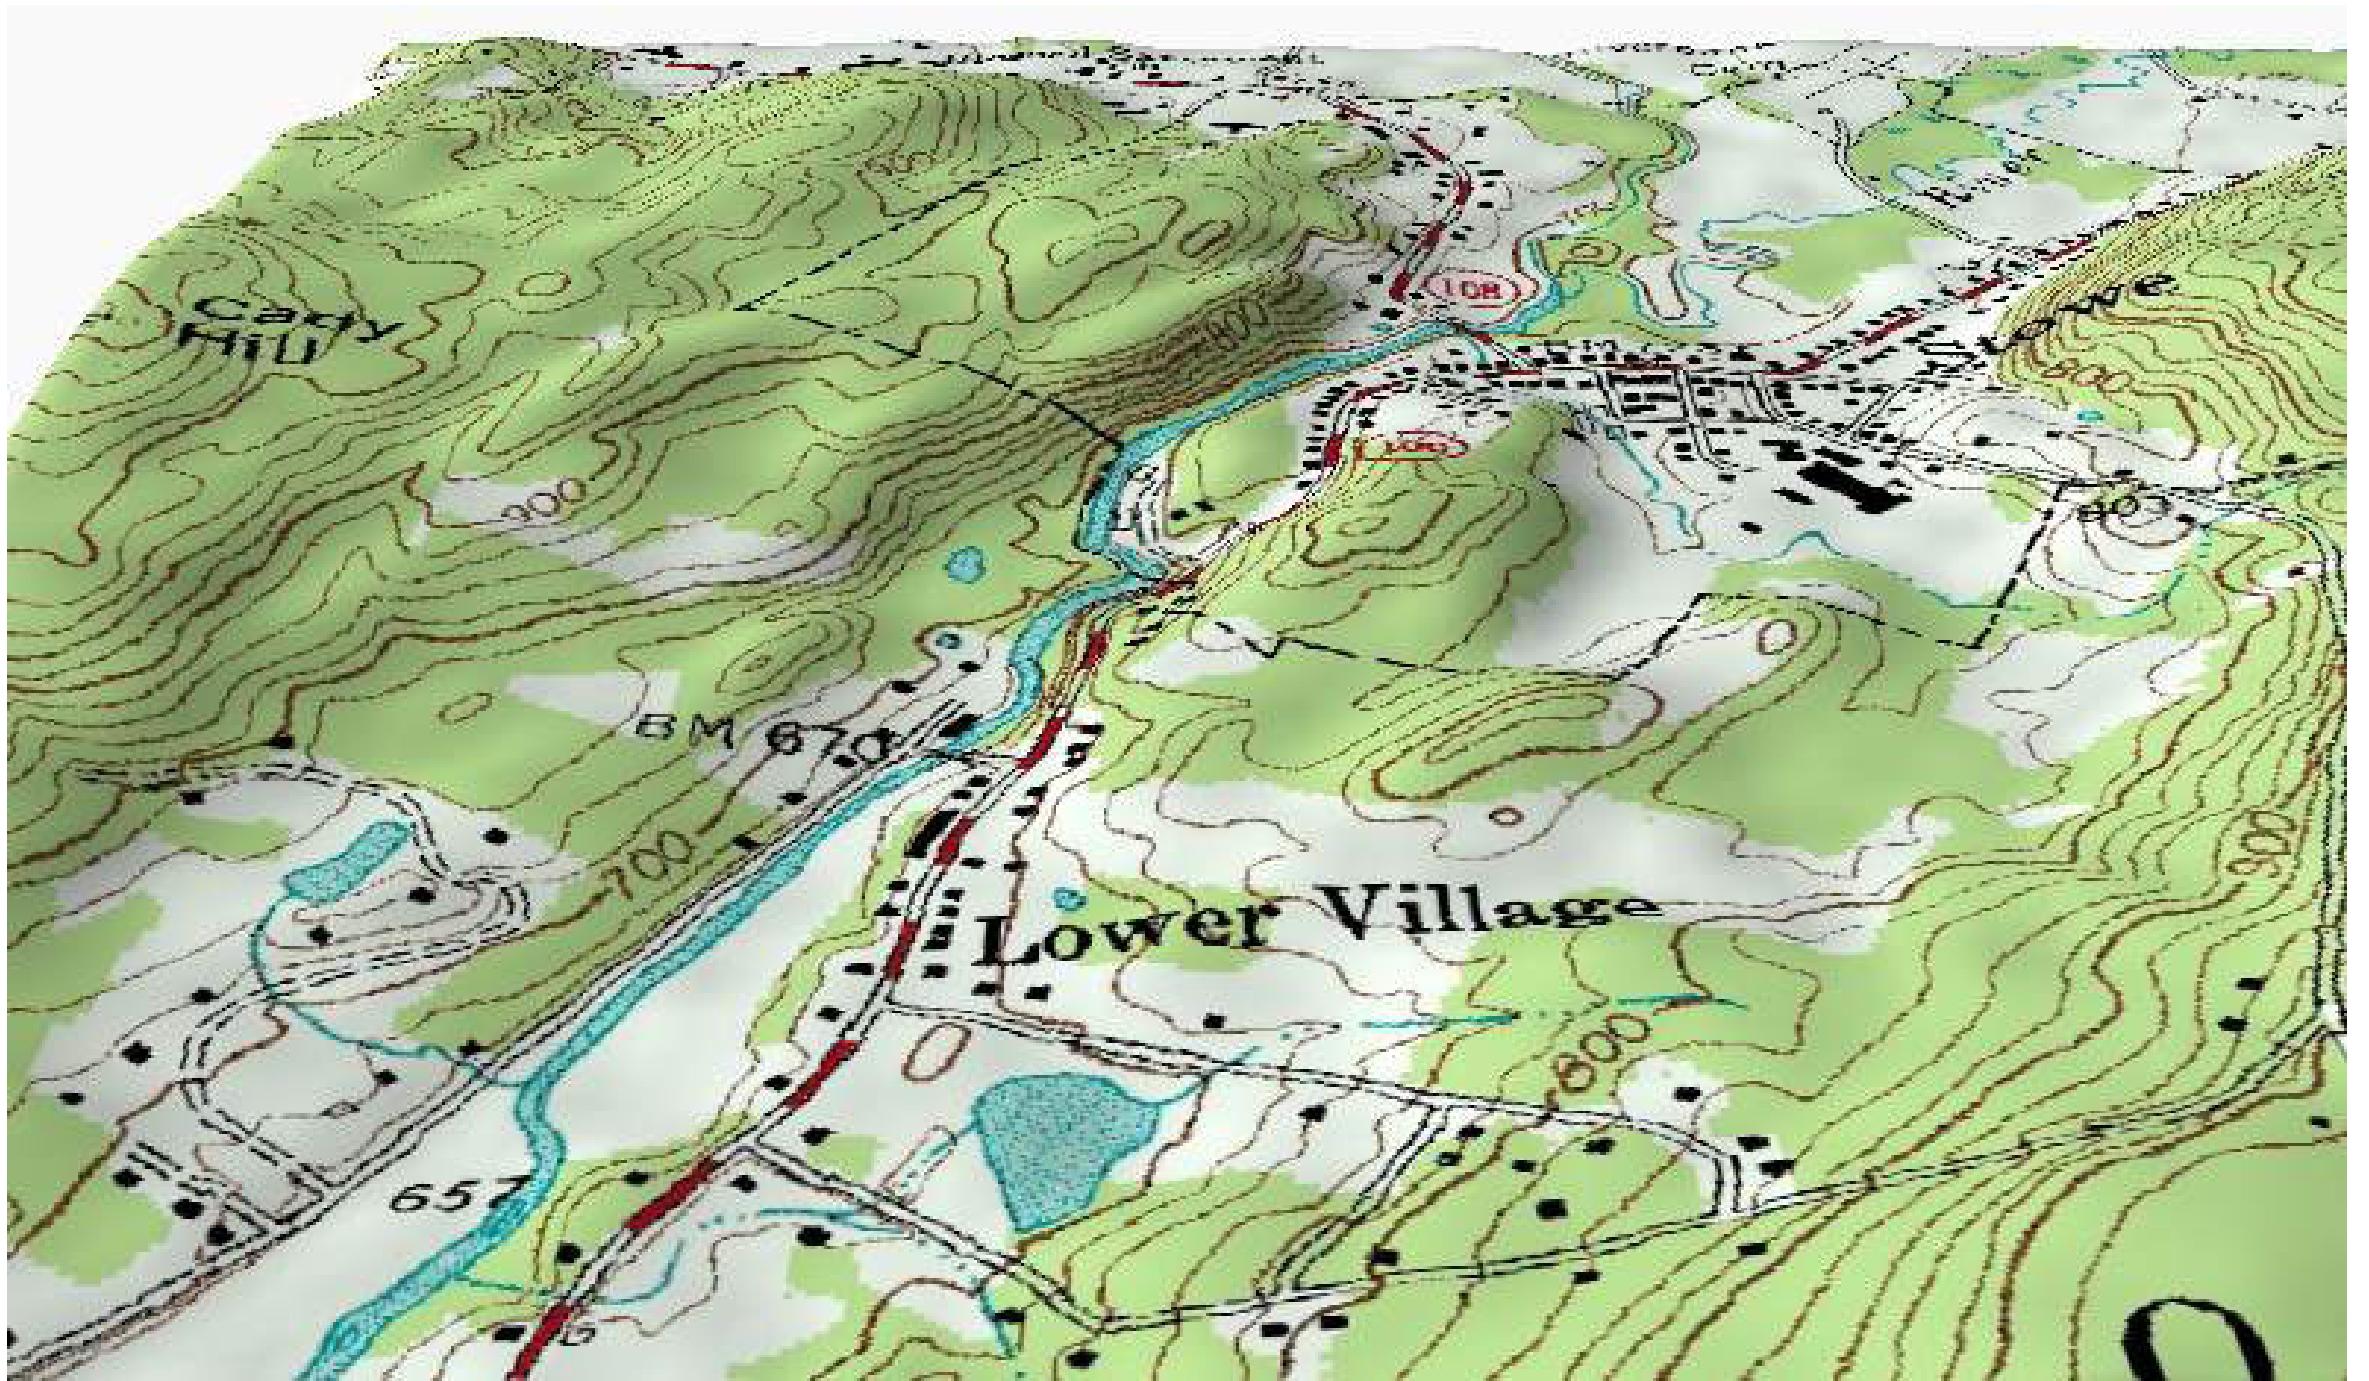

In modern mapping, a topographic map is a type of map characterized by large-scale detail and quantitative representation of relief, usually using contour lines but, historically, using a variety of methods.

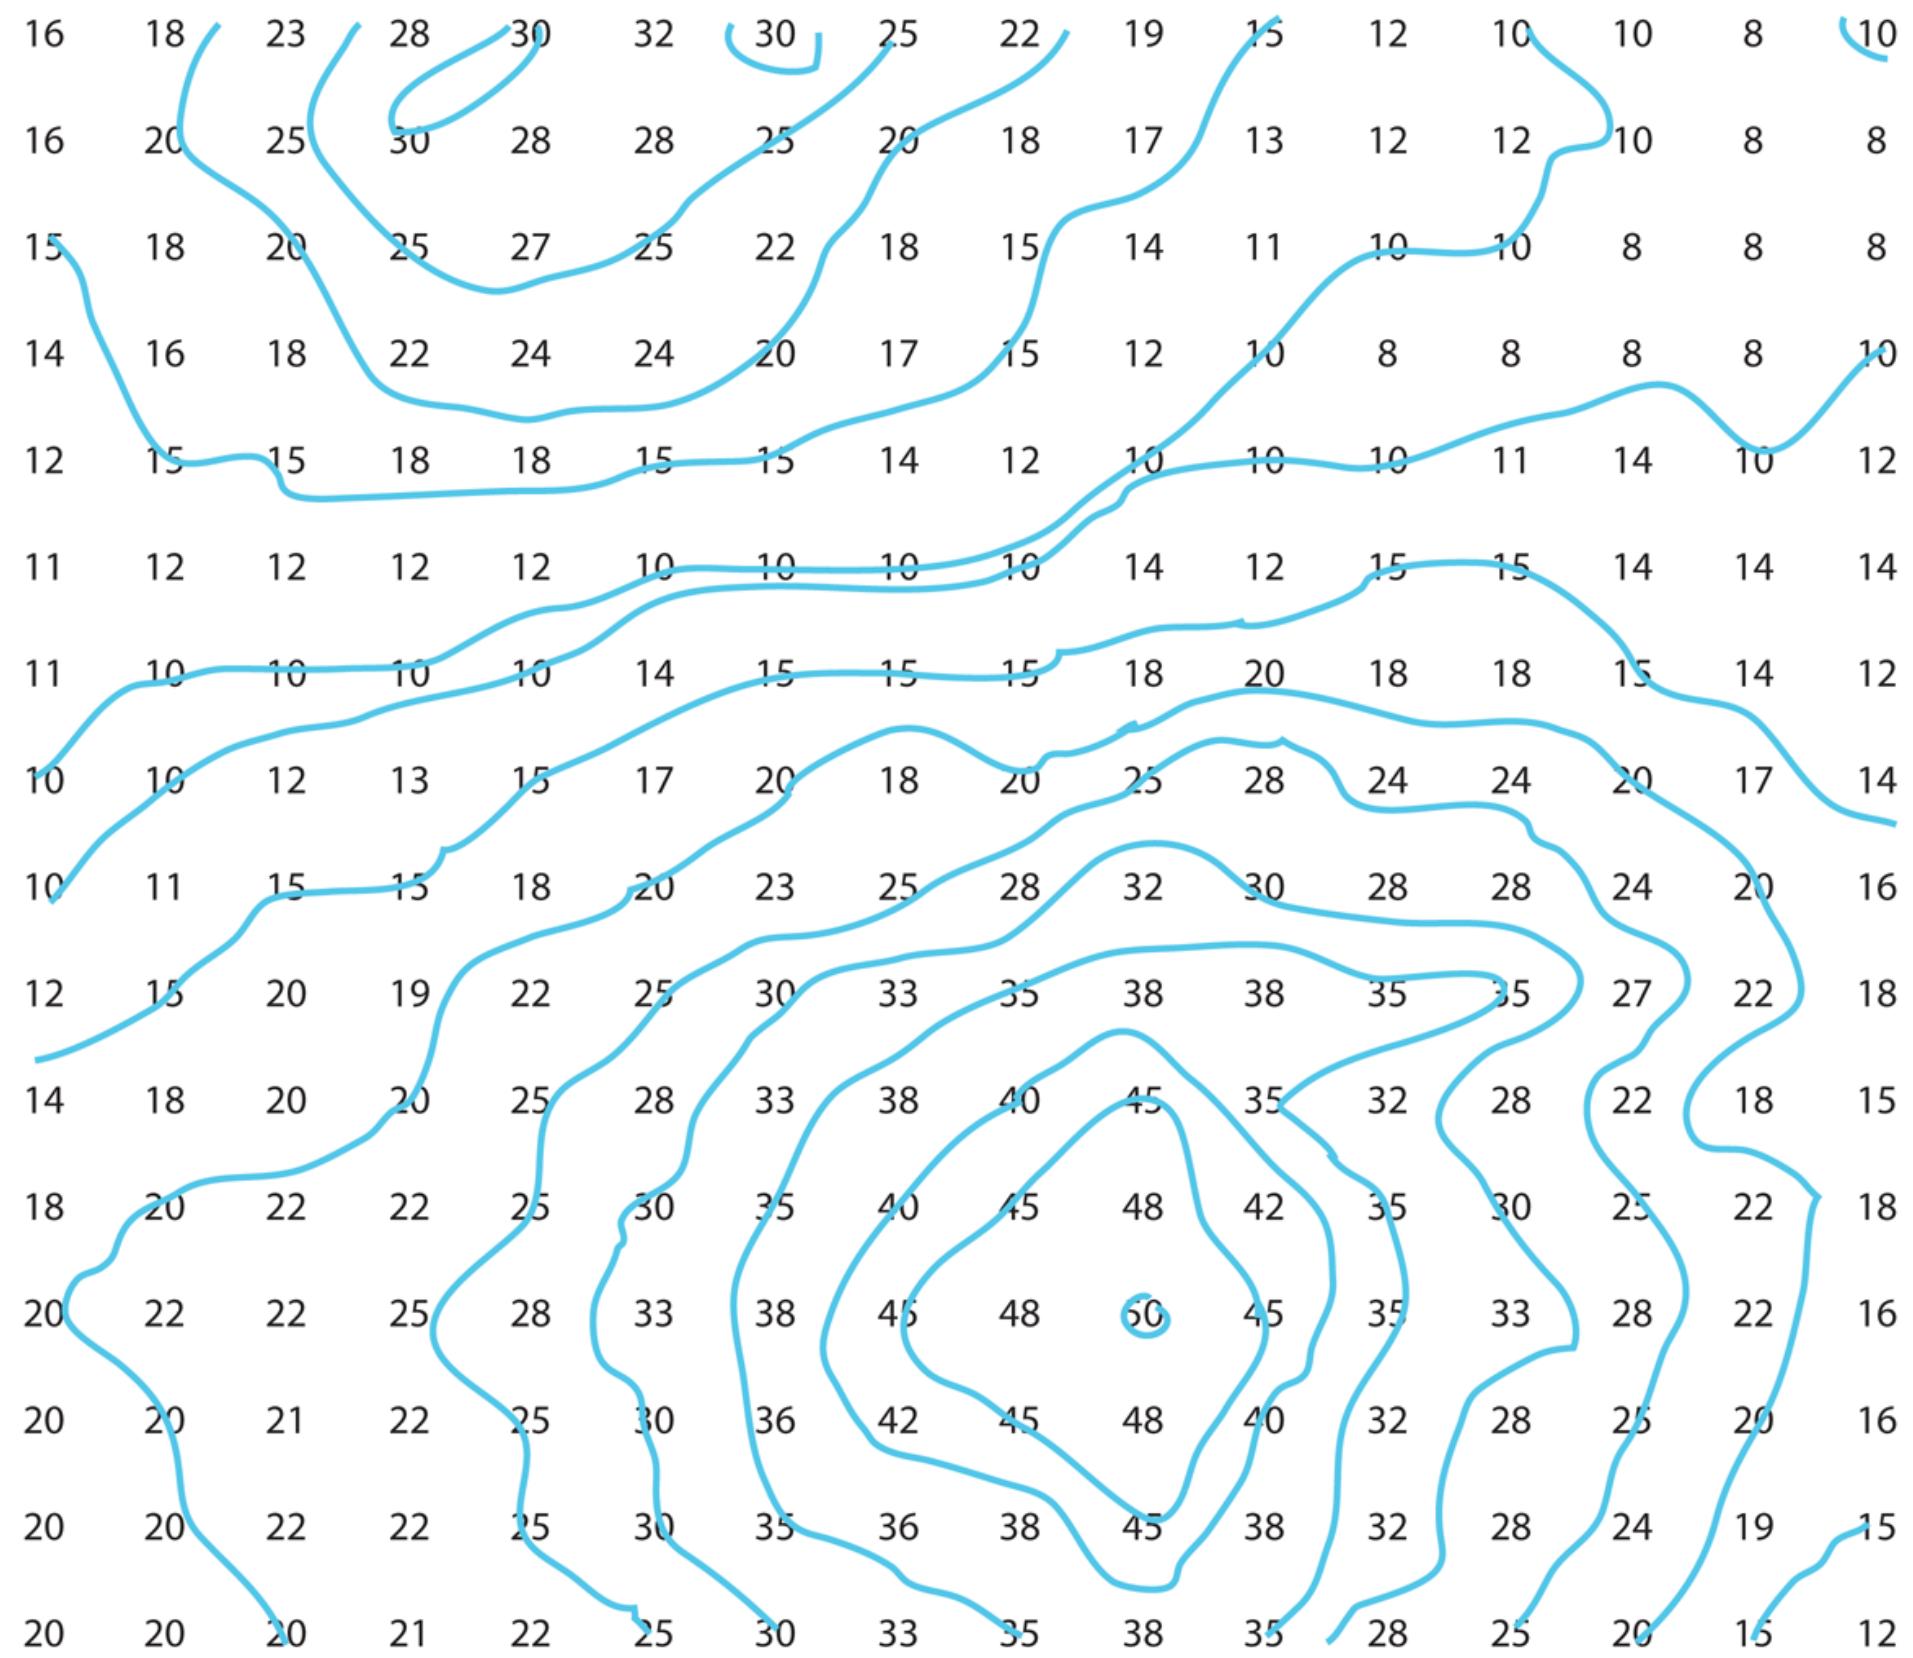

A topographic map is a detailed and accurate graphic representation of cultural and natural features on the ground.
